During this series, Tom focuses on the most common and challenging sections of the coding sequence. He also discusses scenarios from both the clinical and administrative perspectives; topics include adjunctive and diagnostic care, preventive and non-surgical periodontal care, restorations, oral and periodontal surgery and implants, and plan provisions.

The training series will explain:

- How to accurately document, code, bill and collect for today's completed treatment
- How to select the right code for the right procedure, and discern the difference between similar procedure code descriptors
- Which supplemental attachments support the doctor's clinical findings and subsequent treatment plan
- Which codes should not be used in a general dental office
- How to help your patients receive the greatest benefit from their plan – and make sure that everyone is speaking the same language!
- And much more!

What is included?

- The 2007 edition of Limoli's Dental Insurance and Reimbursement – Coding and Claims Submission manual - over 200 pages of information packed with the most current code descriptors (\$139 value)
- Seminar workbook, in electronic PDF format, with a complete outline of the TeleSeminar
- Five, 60-minute educational TeleSeminars on CD covering the new codes, taught by Tom Limoli, Jr. and facilitated by the coaches at Dental Genius™.
